SR-1 SYNTHETIC MOTOR OILS

SAE: 5W-20, 5W-30, 10W-30, 10W-40, 20W-50

>>Description

SR-1 is a selective cross blend of highly advanced 100% synthetic base oils and proprietary additives aimed at power efficiency and engine protection. SR-1's performance is not compromised by standardized additive technology or by our competitors' price points, it is simply a purpose built, specialty formula designed to exceed the demands of high performance Japanese, European and US sports cars. A combination of Generation-2 MPZ and low friction base oils reduce frictional losses to increase horsepower and torque by as much as 3%. A premium polymer and additive system controls viscosity for long term durability, maximum engine protection and eliminate engine deposits.

Torco SR-1 is the ultimate in high performance synthetic motor oil technology.

No other synthetic motor oil meets the performance and protection benefits of SR-1.
